

The world of the imagine, of the writing, of the sound and of the word is living extraordinary moments. This world could reach the highest index of approval only if a larger number of supporters could give their developing support. In this world of imagines and optical registration there is only a theme but a lot of faces, only a thought and many registrations. Although people are poles apart, they can have a just idea about this world.

The association "Euterpe", thanks to the contribution of its supporters, has thrown with this project the basis for a concrete knowledge of the art. The association has created an internet site in which will be shown the art exhibition. Besides, this website can become the virtual place in which people of all the world – if possible comfortably sat in their home – can enter, chat and they can also freely speak through a permanent forum.

The association "Euterpe" marks today the valour of the artistic thought, even in the most secret angles. The art is made by progressive emotions and it has always hidden alveolus of discussion, otherwise it is like a germ that can transform itself and it also can surpass those difficult moments that can be useful to the humanity to understand possible mistakes made in the past.

The association "Euterpe" believes in this artistic project and this is the substantial event that invites the lovers of this genre to stand together and besides, it also invites these lovers to cover those paths which characterize our future. We have to thank who has believed in this project and I want to underline the sensibility of the mayor Leonardo Giordano.

Montalbano Jonico, with this permanently and artistic show, will be a international point of reference, artistically speaking. Besides, thanks to the website, people can also know the historical and cultural reality of Montalbano Jonico.

Rocco PONTEVOLPE
Presidente "EUTERPE"
